DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Group I, Figs. 1-3, in Paper No. 9 is acknowledged.
2. Claims 6 and 7 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected species, there being no allowable generic or linking claim. Election was made **without** traverse in Paper No. 9.

Claim Rejections - 35 USC § 102

3. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

4. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Asano et al., U.S. Patent 5,086,663.

Asano et al. shows, in Figs. 1-7, a pedal device for a vehicle, comprising;

a depressable portion 27 which is to be operationally depressed by a driver of the vehicle;

an output member 21 pivotably supported by a supporting shaft 2 provided in a bracket 1 that is fixed to a body of the vehicle 30, such that the output member is pivoted about the supporting shaft when the depressable portion is operationally depressed, for thereby applying to a motive-power transmitting member 11 an output corresponding to a depression force which is applied to the depressable portion;

Art Unit: 3682

a longitudinal adjustment device 22 to move the depressable portion in a longitudinal direction of the body of the vehicle when the depressable portion is not being operationally depressed; and

a pedal ratio varying mechanism 6, disposed between the output member and the motive-power transmitting member, and capable of adjusting a pedal ratio (DS/DL) of the pedal device.

Allowable Subject Matter

5. Claims 2-5 and 8 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Conclusion

6. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Variable ratio lever mechanism.
